

Project: 01

User Story 0001: Add the Belgium country to the country dropdown list option.

Description: The scope of this US is to add the **Belgium** country to the country dropdown list option. And after applying the **Belgium** country option system should select currency format as pound.

Acceptance Criteria:

1. The Belgium option should be displayed in the country dropdown list after the USA Option, and the user should be able to select the option
2. Once the user selects the Belgium option, a new tab will display, in which the default currency format should be displayed as pounds as per the mock-up
3. Apply button should be available, and it should be enabled

Tasks

1. Write the Test Scenario and test cases based on the acceptance criteria for the newly implemented functionality with:

Test case Id
Test case desc
Expected Value
Test Data (optional)

2. While executing the test scenario, you found the Belgium country flag is not displaying correctly, raised the bug and provide the below details.

Bug title
Severity of the bug
Steps to reproduce
Actual Result
Expected Result
